INFORMATION ON TRICHOPTERA FROM SOUTHEASTERN ASIA
(continued from No.18)

Oliver S.FLINT, National Museum of Natural History, Smithsonian Institution, Washington DC 20560, U S A.:
We have material, of varying quantity (both in alcohol and on pins), from Ceylon, Taiwan, Philippines, Sabah, New Guinea, Malaysia, and various small lots from many other countries. I am always happy to have anything worked up by recognized specialists. I ask that borrowers only request groups that they are actively studying, not for everything that they might hope to work on.

Arturs NEBOISS, 8 Andrew Street, Forest Hill 3131, Victoria **OR** Department of Entomology, Museum of Victoria, 71 Victoria Crescent, Abbotsford 3067, Vic. Australia.
Investigation area: SW-Pacific - Australia - New Guinea up to and including Sulawesi (to Wallace line). - Material available: All families - extensive material of adults, also large numbers of larvae; great part of Wallace Expedition 1985 to Sulawesi. Material on loan from Leiden and Amsterdam Museum (Sulawesi), large part of New Guinea material from Bishop Museum Honolulu. - Current and future research: Adult taxonomy - Hydropsychidae of Sulawesi, some Philorheitridae of Australia; new Polycentropodidae from Australia, New Guinea and Sulawesi; small collection from Bougainville Isl.; also study of Ulmer's types of Hydropsyche and Hydromanicus spp. from Sulawesi. - Research already done: 1988/91 period publications include Rhyacophilidae, Glossosomatidae, Hydrobiosidae, Polycentropodidae, Psychomyidae, Goeridae, Lepidostomatidae and some Leptoceridae from parts of the investigation area as specified above. - Willing to study adults: yes - Australia - New Guinea - Sulawesi by previous arrangement. - Material wanted: Adults from the entire investigation area. - Comments: Certain groups (genera or families) are under investigation, distributed to a number of investigators.

CHANGE OF ADDRESSES

Dr.**Brian J.Armitage**, Director, Ohio Biological Survey, 1315 Kinnear Road, Columbus, OH 43212-1192, USA.

Dr.**John Edington**, 3 Elm Grove Road, Whitchurch, Cardiff CF4 2BW, U.K.

Takao Nozaki, Water Environment Division, Environmental Research Center of Kanagawa Prefecture, 842, Nakahara-Shimojuku, Hiratsuka, Kanagawa, 254, Japan.

Armin Weinzierl, Innere Regensburger Straße 14, D - 8300 Landshut, Germany.

DEPOSITORY OF LIMNEPHILUS INNUITORUM TYPE MATERIAL

A.P.Nimmo

In a recent publication I omitted to give the depository of the type material for Limnephilus innuitorum Nimmo 1991, there described as new. The type specimens as listed in the paper are deposited in the Royal Ontario Museum, Toronto, Canada.

Nimmo,A.P., 1991, Seven new species of Limnephilus from western North America with description of female of L.pallens (Banks) (Trichoptera, Limnephilidae, Limnephilinae, Limnephilini). - Proc.ent.Soc.Wash. 93:499-508.

BOOK RECENTLY PUBLISHED

Aquatic Invertebrates of Alberta. An illustrated guide by Hugh F.Clifford. 550 pages; color photographs, figures, pictorial keys, glossary, bibliography, survey of references, index. $ 82.00 cloth, $ 70.00 paper. The University of Alberta Press, 141 Athabasca Hall, Edmonton, Alberta T6G 2E8, Canada.

XI INTERNATIONAL PLECOPTERA SYMPOSIUM

August 17-20,1992 at Treehaven Field Station, University of Wisconsin. - Information: Dr.Stanley W.Szczytko, College of Natural Resources, University of Wisconsin, Stevens Point, WI 54481, U S A.
